## Understanding Trust Network Compatibility

Different blockchains operate under different standards. Trust crypto specialists help users understand **ERC-20**, **BEP-20**, and other supported blockchain networks to avoid transaction errors.

Trust support guidance helps you:

- Select the correct blockchain network for deposits and withdrawals
- Prevent loss of funds caused by wrong network selection
- Confirm token compatibility before initiating transactions

As blockchain technology continues to evolve, Trust provides updated best practices to ensure secure and accurate transfers.

## Trust Crypto Support – Frequently Asked Questions

### 1. My crypto deposit hasn't arrived. Can Trust help?

 Yes. Trust Support verifies blockchain confirmations and wallet synchronization.

### 2. Why is my withdrawal delayed or failing?

 Support assists with network congestion, gas fee issues, and confirmation delays.

### 3. Does Trust support every cryptocurrency network?

 No. Token and network compatibility depend on blockchain standards.

### 4. What if I sent crypto to the wrong address or network?

 Funds sent to incorrect networks may be unrecoverable—contact Trust Support for review.

### 5. Why is my transaction still pending?

 High network traffic or low fees are common causes. Support can track your TXID.

### 6. Can Trust refund failed crypto transactions?

 Refunds depend on transaction status and blockchain confirmation.

### 7. Is live chat faster than email support?

 Yes. Live chat typically provides quicker, real-time assistance.

### 8. What information should I provide to Trust Support?

 TXID, cryptocurrency type, blockchain network, and screenshots.

### 9. Can Trust help after suspicious wallet activity?

 Yes. Contact **Trust Security Support** at +1-(504)-217-3042 immediately.

### 10. Can I ask about upcoming token support?

 Trust does not confirm unreleased tokens but provides compatibility guidance.
